Address

Gebze, Kocaeli, Turkey, 41100

Education

2016 - 2021

Electrical and Electronics Engineering Bachelor Degree

Duzce University, Duzce, Turkey

Expertise

Confidence;

- Python (Django, Flask, PyTorch),
- Node JS, React JS

Familiar;

- Flutter, React Native,
- Go, C#, Rust, C++
- AWS, MySQL

Language

English

Turkish (native)

Experience

2021/11 - Present..

ArmaDx Technology | Kocaeli, Turkey

Machine Learning Developer & Python Developer

In a domestic Search Engine project, I am;

- Creating folder structure and code architecture for Python development,
- Developing Neural Network structures, training/validation basics for future use,
- Leading Natural Language Processing (NLP) and Image Processing teams.
- We have improved image-based search results by 80% so far

2021/06 - 2021/10

Ayhan Computer and Electronics LTD | Sakarya, Turkey

Embedded System Developer (+ Intern)

- I was part of a team that built server systems, designed electronic circuits, and wrote embedded system code.
- I wrote an embedded system code that works with 82% efficiency and it ran on 4000 ARM processors.

2020/01 - 2021/10

Self Employment | Sakarya, Turkey

Freelance Software Developer

- I made project-based solution agreements with individuals and companies in the fields of artificial intelligence, web, robotics.
- I opened a basic and intermediate python course for people of all ages.

2019/05 - 2020/01

Realkom Textile LTD | Duzce, Turkey

Research & Development Engineer (+ Intern)

- I was part of a team that designed electronic circuits
- I wrote embedded system code to improve product counting efficiency.
- The project of my team provided 96% efficiency in counting products
